Complete Setup Guide

What You Need

- A Claude Pro, Team, or Enterprise account (claude.ai)
- The Apify connector (free to enable)
- Your LinkedIn profile URL

Step-by-Step Setup

Step 1: Open Claude Go to claude.ai and start a new conversation.

Step 2: Enable the Appify Connector

- Click the **+ (plus) icon** at the bottom of the chat box
- Click on **"Connectors"**
- Find **"Appify"** in the list
- Click to **enable** it
- If it asks for permissions, click **"Allow"**

Step 3: Copy Your LinkedIn URL

- Open LinkedIn in another tab
- Go to your own profile
- Copy the full URL from the address bar (it looks like: https://www.linkedin.com/in/your-name/)

Step 4: Paste the Prompt

- Go back to Claude
- Copy the entire prompt from Part 2 above
- Paste it into the chat box

Step 5: Add Your LinkedIn Link

- In the prompt, find where it says [PASTE YOUR LINKEDIN URL HERE]
- Replace that with your actual LinkedIn URL

Step 6: Press Enter

- Hit Enter and wait
- Claude will use the Appify connector to visit your LinkedIn profile
- It will read through your entire profile
- Then it will generate all the suggestions

Step 7: Use the Output

- Copy the new headline → paste it into your LinkedIn headline

- Copy the About section → paste it into your LinkedIn About section
- Review the experience suggestions → update your roles one by one
- Update your featured skills
- Follow the bonus quick wins

Troubleshooting

Problem	Fix
Appify doesn't appear in Connectors	Refresh the page and try again. Make sure you're on a Pro/Team plan.
Claude says it can't visit the URL	Make sure your LinkedIn profile is set to **public**. Go to LinkedIn Settings → Visibility → Edit your public profile.
Output is too short or generic	Add more context to the prompt. Before the prompt, write: "I am a [your role] in [your industry] targeting [your audience]."
Claude gives an error	Start a new conversation and try again. Sometimes connectors need a fresh session.

The Claude Prompt

Copy and paste this entire prompt into Claude after enabling the Appify connector:

You are a LinkedIn Profile Optimization Expert. I'm going to give you a LinkedIn profile URL. Your job is to visit the profile, analyze every section, and give me specific, actionable suggestions to make it stand out.

Here is the LinkedIn profile to analyze: [PASTE YOUR LINKEDIN URL HERE]

Please visit this profile using the Appify connector and analyze it thoroughly. Then give me the following:

---

1. HEADLINE OPTIMIZATION

- What the current headline says

- Why it's weak or could be better

- 3 new headline options (each under 120 characters) that:

  - Lead with the value I provide, not just my job title

  - Include relevant keywords for search visibility

  - Sound human and confident, not robotic

- Pick your #1 recommendation and explain why

---

2. PROFILE PHOTO & BANNER

- Rate the current photo (1-10) and explain why

- Give 3 specific tips to improve the photo (lighting, background, expression, clothing)

- Suggest what the banner image should show (personal brand, company, achievement, tagline)

- Write the exact text that should go on the banner if applicable

---

3. ABOUT SECTION REWRITE

- Write a complete new About section (max 2,600 characters) that:

  - Opens with a bold first line that hooks the reader

  - Tells my professional story in first person

  - Highlights key achievements with specific numbers where possible

  - Shows personality — not a boring corporate bio

  - Ends with a clear call-to-action (what I want people to do after reading)

  - Includes relevant keywords naturally (not stuffed)

- Format it with line breaks for easy reading on mobile

---

4. EXPERIENCE SECTION

- Review each role listed and suggest:

- Stronger bullet points that focus on RESULTS, not responsibilities

- Numbers and metrics to add (even estimates if exact ones aren't shown)

- Better role descriptions that show impact

- Give me 2-3 rewritten bullet points for each role as examples

---

5. SKILLS & ENDORSEMENTS

- List the top 10 skills I should have pinned based on my profile

- Identify any missing skills that are critical for my industry

- Suggest which 3 skills to feature at the top

---

6. BONUS QUICK WINS

- Featured section: What should I pin there? (posts, articles, links, media)

- Custom URL: Suggest a clean LinkedIn URL if it's not optimized

- Activity: What type of content should I post to match my positioning?

- Recommendations: A template message I can send to 3 people to request recommendations

---

FORMAT: Give me everything in a clear, organized format. For every suggestion, tell me:

1. What it currently says (or looks like)

2. What's wrong with it

3. The exact replacement text or action I should take

Be specific. Be opinionated. Don't give me vague advice — give me copy I can paste.
